UNIVERSAL DOUBLE BAR SAFETY GATE (UDG)

EASY INSTALLATION

- Universal hinge design provides either left-hand or right-hand swing
- Universal hinge design will attach to most common guardrails
- For angle iron, flat bar, or plate installation: 2 bolts for hinge and 1 bolt for block
- For pipe or square tube: Add-on installation kits are available

DESIGN

- Gate automatically closes due to gravity
- Rises when opened; returns closed when released
- Design does not depend on springs, cams, bearings, or the operator
- Has a horizontal swing, not a vertical drop
- Available in 4 standard sizes
22" / 560mm 27" / 690mm
32" / 820mm 37" / 950mm

WIDESPREAD SUCCESS

- Proven design has been successfully used for over 30 years
- Sold more than 500,000 units in over 60 countries and all 50 US states
- Specified by many multi-national industrial companies
- Recommended by many engineering firms
- Exceeds US OSHA and other worldwide safety standards

MATERIAL STRENGTH & WEATHERABILITY

- Withstands 400 lb (180 kg) impact test at ambient, as well as extreme cold temperatures (-70°F / -56.7°C)
- Excellent outdoor weatherability; supports heavy loads 24/7
- In sunlight, material will surface discolor but not degrade
- No loss of tensile strength after 9 months in Arizona and Florida UV-exposure tests

BENEFITS

- Safe & effective
- Maintenance free
- Long service life
- Proven design
- Provides the protection you want
- Economical

CONSTRUCTION

- All molded parts are made from a strong, rigid, UV-resistant polyurethane
- Molded parts colored throughout with safety yellow
- Fluoropolymer wear plate and bushings facilitate easy open & close
- Galvanized hardware provided
