

Many Solutions. One Resource.

OSCO is the home of the ReadySeries lineup of modular, pre-engineered safety, maintenance and access solutions. Designed for easy assembly and stocked for quick shipping, ReadyPlatform, ReadyLadder, ReadyRail, ReadyStair and ReadySpan systems can be combined into almost any configuration.

PRE-ENGINEERED SOLUTIONS

Systems include hardware, handrail components, platform sections and supports. Meets OSHA guidelines with anti-slip surfaces, safety yellow components and fire-retardant resins.

Easily bolt ReadyLadder sections together to get the ladder height you need. All assemblies meet OSHA load requirements. Anti-slip rung surfaces for added safety.

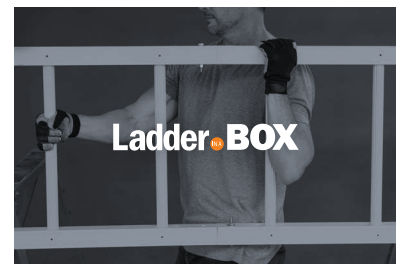

ReadyRail safety rail components work seamlessly with all ReadySeries products to add guardrail and handrail systems for a complete safety solution. Meets OSHA and IBC regulations.

Available in a variety of standard sizes, ReadyStair stair sections and handrail components can be combined with ReadyPlatform materials to meet any configuration need and OSHA requirements.

ReadySpan pre-engineered pedestrian, equestrian, golf course and light vehicle bridge systems have the strength to meet the demands of load-carrying conditions, and the durable material will last for decades.

Ladder-In-A-Box provides durable ladder sections and hardware in a box for fast, economical shipping. OSHA-compliant safety yellow is integrally pigmented.

COMPOSITE STRUCTURAL SHAPES & GRATING

Structural Shapes

Comprehensive lineup of high-strength, corrosion- and chemical-resistant composite profiles.

Molded Grating

Variety of thicknesses and grid patterns for trench covers, walkways, platforms and more. Slip-resistant coating available.

Pultruded Grating

Perfect for applications needing added strength for longer spans and heavier loads. Our selection can handle vehicular traffic, ADA-compliant walkways and more.

Grating Clips & Fasteners

Easily secure grating with our wide selection of easy-to-install, rugged clips, all made of stainless steel for durability.

UTILITY MARKING PRODUCTS

Utility Markers

Most markers are made from durable composite materials, so they won't rust, rot or warp.

Cathodic Protection Testing & Tracing

Easily trace, monitor, take readings and test buried structures.

Marking Flags

Preprinted and customizable flags and decals in a wide range of colors.

Safety Signs & Decals

Preprinted and customizable graphics and text to meet your specifications and the requirements of federal and state agencies.
