Get A Grip On Safety Rails

STOCKED FOR QUICK SHIPPING

Like all ReadySeries materials, handrail and guardrail systems live up to their “ready” name. A large inventory is maintained to ensure availability for quick shipping. In most cases, your ReadySeries structural components will be ready to ship within three business days. The 3', 8', 15' and 20' rail lengths can be modified as needed to meet the dimensional requirements of your project.

RAILING FOR ANY CONFIGURATION

From long stretches to multiple turns, ReadySeries handrail and guardrail materials can meet the exact needs of your specifications. They combine seamlessly with platforms and crossovers, stair towers and fixed ladders to form industrial safety, access and maintenance solutions of any size and shape.

EASY TO ASSEMBLE

No welding equipment or hot work permits needed! Anyone can install ReadySeries materials, which bolt together easily using ordinary tools. In most cases, the variety of sizes will give you exactly what you want, but if needed you can also easily trim components to fit using standard tools.

SAFETY ELEMENTS BUILT IN

Like all ReadySeries solutions, handrail and guardrail materials meet OSHA guidelines and feature safety yellow coloring and fire-retardant resins. All materials are non-conductive for added safety.

DECADES OF DURABILITY

Metal rails rust and corrode. Wood rails rot and warp. ReadySeries materials are built to maintain their structural integrity and appearance year after year in even the harshest conditions. The color is embedded throughout, so there's no worry about fading and no maintenance costs for repainting. The added protection of ReadyShield UV-resistant coating ensures performance for years to come.

- Resistant to heat, high winds, rain, snow, salt water and chemicals
- Won't shrink, swell, warp, corrode, dent, attract insects or conduct electricity
- Low maintenance for decades of continuous use
- Lightweight for easy transport and handling
- OSHA and IBC compliant guardrails

> **PROTECTED BY**  **READY SHIELD**

Built To Last

To keep people safe, handrail and guardrail systems need to hold up against harsh environments and working conditions. ReadySeries prefabricated solutions are made of fiberglass-reinforced polymer (FRP), a lightweight yet incredibly strong material that won't rust, warp or corrode like metal and wood.

APPLICATIONS

- Aerospace & defense
- Architectural
- Commercial operations
- Cooling towers
- Distribution & warehousing
- Fertilizer & chemical operations
- Food & beverage facilities
- Industrial plants & facilities
- Oil & gas
- Packaging & processing
- Power generation & utilities
- Pulp & paper
- Rubber & plastics
- Safety applications
- Water & wastewater
- Much more

QUICK-SHIP OPTIONS

1 3', 8', 15' AND 20' SECTIONS

2 RAILING KIT BASED ON YOUR CONFIGURATION

3 TANK-SPECIFIC RAILING

AVAILABLE EXCLUSIVELY THROUGH OSCO SAFETY

OSCO Safety is a recognized leader in top-quality industrial safety products and utility safety solutions, making OSCO a natural fit for ReadySeries sales and service. You'll have a single point of contact guiding you through your purchase. If needed, OSCO also offers engineering, design and drafting services. With ReadySeries, OSCO Safety is your one-stop shop for complete safety, access and maintenance systems.
